

Important EFTPOS Announcement

Now you can save money on phone lines and use the internet

ClickPOS has been working with Direct Payment Solutions to bring you an integrated Broadband EFTPOS solution.

with over 100 Thousand Customers using Payment Express Technology, and hundreds of customers using the DPS | ClickPOS, It's time to revise your current setup and upgrade to the latest, safest and fastest payment technology to date.

One of ClickPOS clients with 11 stores is now saving over \$1400 per month, just on lower credit card rates.

Integrated Broadband EFTPOS will reduce the phone line overhead cost and improve the level of service.

KEY POINTS

- » Integrated with 'ClickPOS' – eliminates keying errors and provides a faster level of service
- » Very quick – up to 5 times faster than other EFTPOS terminals
- » Reduce time to reconcile accounts with Payment Express detailed online settlement reports
- » Elegant USB powered PINpad – Single wire connecting PINpad to PC
- » Chip card capable
- » Contactless 'Tap and Go' 

Given this advance in EFTPOS technology, it is a good time to review your business' current EFTPOS requirements to ensure they remain competitive and continue to meet your business' needs.

If you are currently locked into a contract or own your existing hardware, talk to us anyway about how we can save you money.
